**SECTION 5 : FIREFIGHTING MEASURES**

---

**5.1 Extinguishing media**

Individuals should perform only those firefighting procedures for which they have been trained. Use water spray, dry chemical, alcohol foam or carbon dioxide. Use water to keep fire-exposed containers cool. If a spill or leak has not ignited, use water spray to disperse the vapors. Water spray may be used to flush spills away from fire and diluted spills to noncombustible proportions(see warning on water spray on hot liquid below.)

**5.2 Special hazards arising from the substance or mixture**

Data not available

**5.3 Advice for firefighters**

Fire fighters should wear self-contained breathing apparatus in the positive pressure mode with a full face piece when, there is a possibility of exposure to smoke, fumes or hazardous decomposition products. Water spray may cause foaming of hot glycol so indirect application of water spray or use of other extinguishing media should be used on hot liquid.
